SUMMARY

Full Stack Java Developer with 1 year of experience in Java, SQL, and JavaScript. Proficient in developing scalable and robust applications using industry best practices. Eager to contribute to the success of company by leveraging strong technical skills and a passion for solving complex problems.

PROJECTS

Generator , Rental And Services

ProjectLY · karangenerators.projectly.in · January 2024 - March 2024

· As the developer of the generator rental sales and services project, I was responsible for designing and implementing the software solution that streamlined the sales process and improved customer service. I developed a user-friendly platform that allowed clients to easily browse available generators, request quotes, and schedule deliveries.

ProjectLY an IT Company Website

ProjectLY · projectly.in · February 2023 - March 2023

· Project-LY can provide the business IT solutions you need to improve efficiency, add value and lower costs. We design, develop, implement, manage and optimize access to systems and information to answer your business processing, application and development needs.
